# ACTIVE CLEANER

Water-based Cleaner

 DREI BOND  
WHITE LINE

### ACTIVE CLEANER

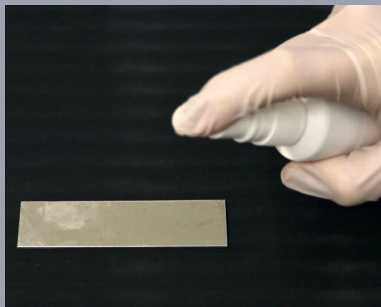

- ✓ Weiches SS8  
White-ICE
- ✓ Einfache Handhabung, geringe  
Anwendungsdosis  
Easy handling, low amount formation
- ✓ Flasche aus 100% recyceltem PET  
Bottle made from 100% recycled PET
- ✓ Hohe Wirkkraft  
Clean of stains
- ✓ Einfache Handhabung  
Easy handling
- ✓ Hohe Wirkkraft  
Clean of stains

## ACTIVE CLEANER

### APPLICATION

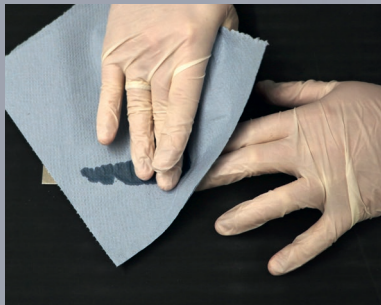

#### Step 1

Spray directly on the dirty substrate.

#### Step 2

Wipe the surface completely with a dry, clean cloth.

#### Why Active Cleaner?

Drei Bond Active Cleaner is a water-based cleaning agent that removes grease, oil and many other types of dirt from metallic and non-metallic surfaces and also improves the adhesion of many adhesives to metallic surfaces.

- White safety data sheet
- Easy handling, low aerosol formation
- Bottle made from 100% recycled PET
- Cleans all surfaces without leaving any residue
- Low health and environmental risks
- Improves adhesion to metals

#### Active Cleaner is part of the new Drei Bond WHITE LINE

The Drei Bond WHITE LINE includes products that are free of any hazard classifications and thus make an active contribution to improved occupational safety.

## ACTIVE CLEANER

Water-based Cleaner

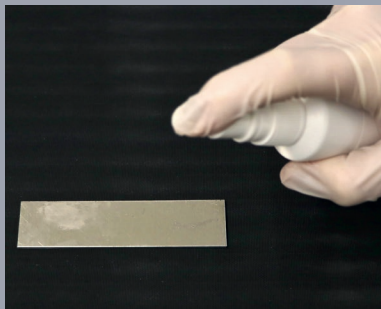

Do you have any questions or need detailed information about the product or its application? Feel free to contact us at any time.

## APPLICATION

### Step 1

Spray directly on the dirty substrate.

## TOP TIPS

### Right

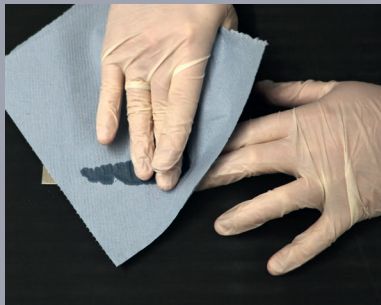

When the cleaner has been wiped off completely, there will be no residue and the substrate is ready for the application.

### Step 2

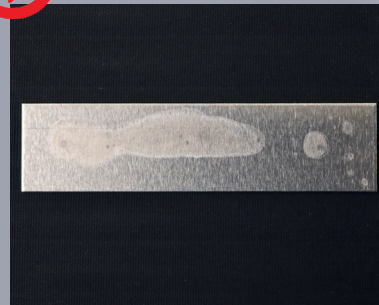

Wipe the surface completely with a dry, clean cloth.

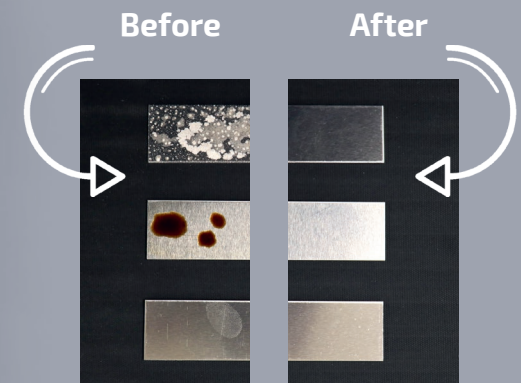

### Wrong

If the surface is not completely dried off, residue will be left on the substrate.

## RESULT

## ADVANTAGES

- Removes many different types of dirt such as salty residue, oils, greases, sweat, fingerprints, and more
- Easy handling, low aerosol formation
- Cleans all surfaces without leaving any residue
- White safety data sheet
- Improves the adhesion of adhesives to metals (especially aluminum)
