

Focusing on Our Strengths – For Your Success

Dear Sir or Madam,

As of March 1, 2026, Drei Bond GmbH will undergo a strategic realignment. With this step, we are strengthening our core competencies, creating clear structures, and consistently developing our service portfolio further – with one clear objective: to provide you with even better, integrated, and future-oriented solutions.

Drei Bond has established itself as a strong and reliable partner for high-performance sealing and bonding solutions in the automotive and multiple other industries. The combination of our chemical products with precise dosing technology and services has always been our unique strength.

As part of our strategic realignment, we are bundling our expertise into two independent companies:

- **Drei Bond GmbH Chemische Verbindungstechnik**
Focus on the development and production of high-performance adhesives and sealants
- **Drei Bond Dosiertechnik & Service GmbH**
Consolidation of expertise in dosing technology, mechanical engineering, and service

For you, this means: clear responsibilities, optimized processes, and seamless integrated solutions – from adhesives & sealants to dosing systems and services.

From Machine Supplier to Automation Partner

With the newly established Drei Bond Dosiertechnik & Service GmbH, we are strategically evolving from a pure machine supplier to a comprehensive automation partner in dosing technology and mechanical engineering. A key element of this development is our technical cooperation with bfa automation GmbH in Ismaning, the German subsidiary of the Swiss company bfa solutions AG. This partnership strengthens our expertise particularly in engineering, software development, and industrial automation. Together, we are expanding into new industries – including medical and electrical engineering – and broadening our technological capabilities.

What Does This Mean for You?

Existing orders agreed with Drei Bond GmbH Chemische Verbindungstechnik until February 28, 2026, will continue to be processed unchanged by this company.

As of March 1, 2026, new orders will be handled by the respective responsible company. Of course, your usual contacts will remain available to you.

With this strategic realignment, we are laying the foundation for sustainable growth, increased technological depth, and expanded production capacities – ensuring that we can continue to support you as a strong and innovative partner in the future.

Should you have any questions, please do not hesitate to contact us at any time.

Kind regards,

Your Drei Bond Team
