

ADHESIVES · ENGINEERING · SYSTEMS

## Company

Adhesives and sealing materials for industrial applications and made-to-measure systems for dosing and the use in nearly all branches: Drei Bond GmbH from Ismaning near Munich offers not only adhesives and sealing materials but also a comprehensive know-how in dosing during the manufacturing process. Due to the tight interactions between chemical knowledge and competence in machine construction (engineering), Drei Bond GmbH is able to offer a unique kind of advice in chemistry and dispensing technology.

Due to long-standing experience, Drei Bond is solving complex tasks also in fields like oiling and greasing because of extensive know-how in this areas and because of an appropriate cooperation with its customers.

Drei Bond GmbH is a part of the LWB firm group since 2013. The company has a worldwide portfolio of customers due to an extensive network of sales and service branches.

---

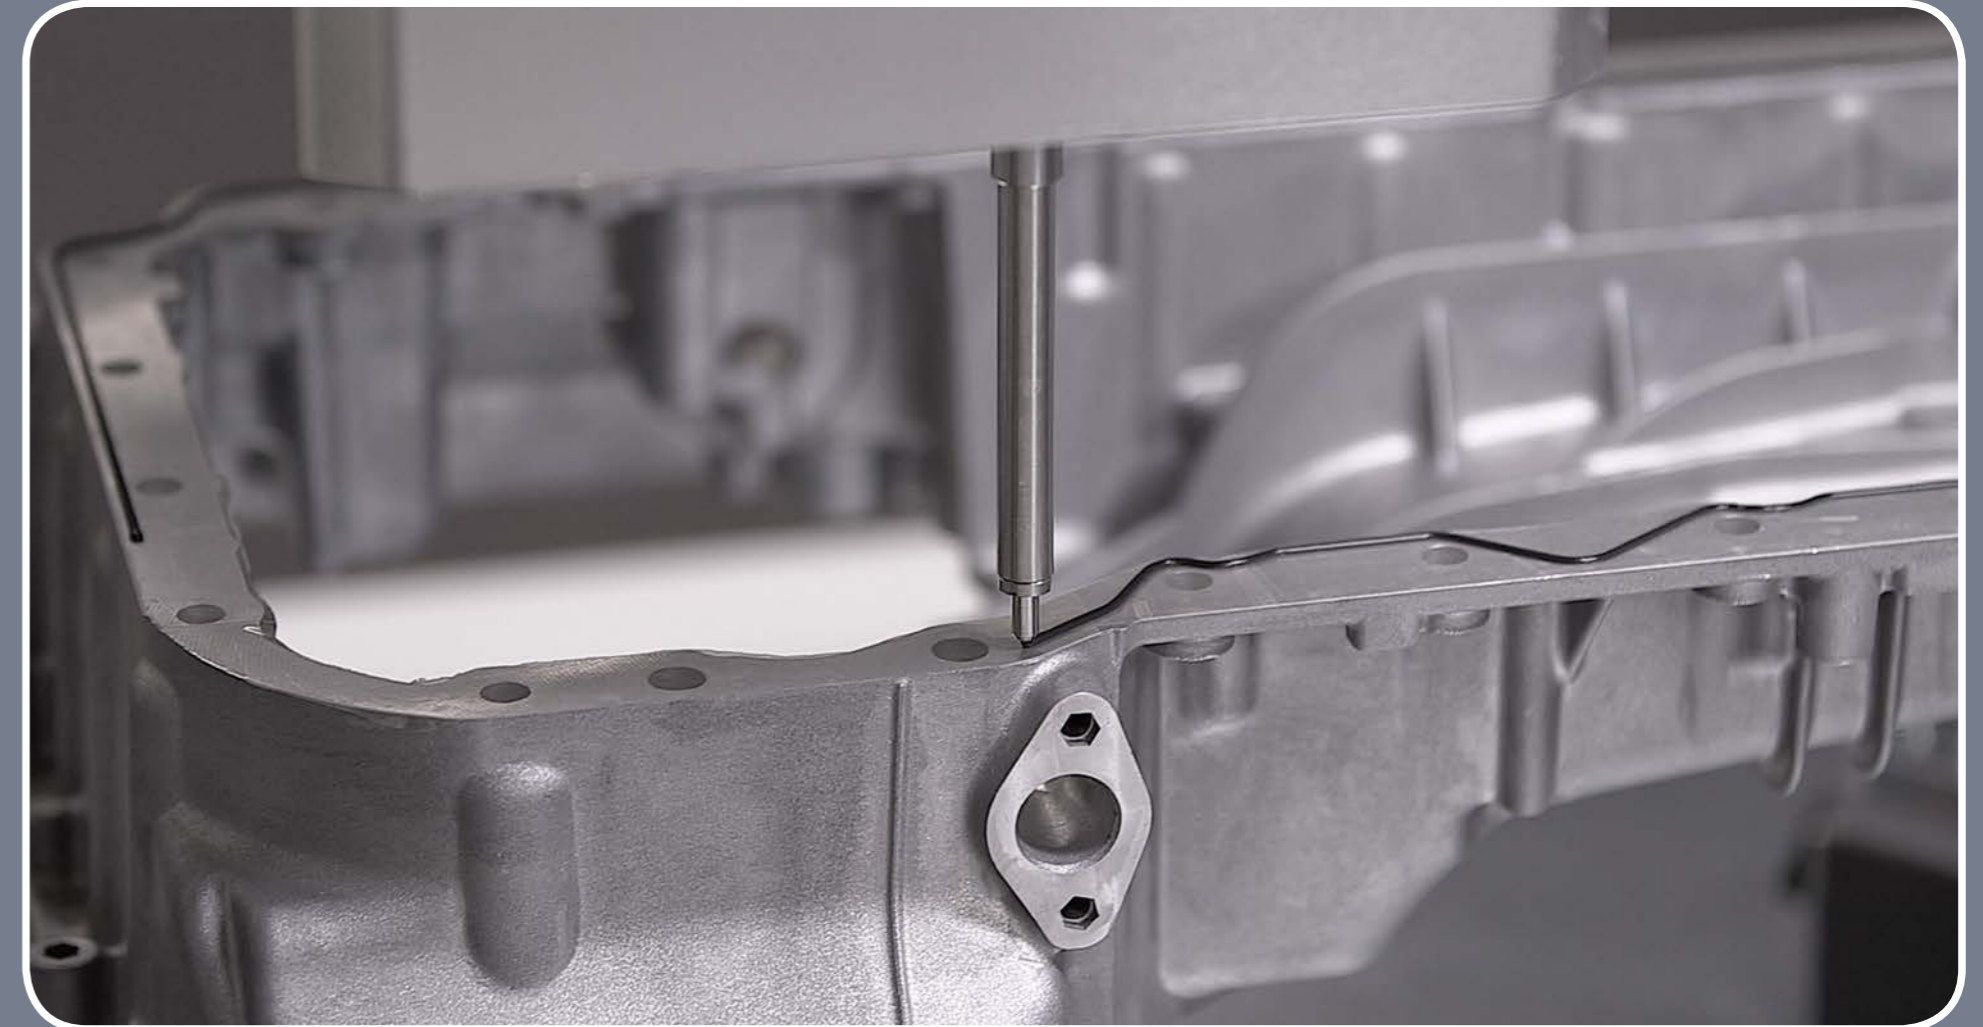

## Adhesives

Drei Bond offers highly effective adhesives and sealing materials for industrial requirements and uses. The wide range of these products embraces almost every branch of industry: automotive industry, mechanical engineering and the branches “gas and water”.

Drei Bond has a considerable portfolio of highly effective adhesives and sealing materials for more than 35 years and is a well-known system supplier for the automotive industry. “Normal” anaerobic adhesives and UV-adhesives are only two examples for the wide range of Drei Bond’s products.

Drei Bond’s strong points are a diversified portfolio of products which can be deployed for almost every problem and the competence in development in finding suitable solutions for new technological uses, like e-mobility or nanotechnology. In principle, all products of Drei Bond meet the expectations of the automotive industry.

---

---

## Systems

Drei Bond offers individual solutions and made-to-measure systems for several requirements in dosing. The extensive experience in constructing special machines under the integration of modern process control predestines Drei Bond experts to solve complex tasks successfully in accordance with its customers. In every project stage – conception, planning and implementation – Drei Bond stands with engineers and technicians on its customer's side.

Of course Drei Bond application technology is available for extensive trials and tests for the purposes of projects.

---

---

## Engineering

Drei Bond designated itself as a close partner of customers. Always if there's a need to find new solutions for dosings, Drei Bond's engineers and technicians are in their element.

Customers benefit from the justification as a whole from Drei Bond as system partners. Outgoing from a customer requirement, Drei Bond's engineering experts directly access to the know-how of colleagues from the chemistry sector in developing a new dosing system.

Early enough, Drei Bond recognized which potentials adhesives have as alternative for traditional conjunction technologies. Drei Bond faces challenges due to customer's modern developments with high innovational strength and short reaction time.

From the beginning, the rapid development in the sector of e-mobility was accompanied by Drei Bond based on the development of adhesives and sealing materials for lodestones and electric motors and based on perfectly developed application systems.

---

## General principle

Drei Bond is a system provider in the following sectors: Highly effective adhesives and sealing materials, oiling and greasing. The company offers chemical solutions as well as suitable application systems and dose machines from one hand to its customers.

Drei Bond's goal is to support the customers as innovative partner with sustainable and technological offers in their respective markets and to reinforce them in their competitiveness. Highest satisfaction of customers is the key point of acting.

The employees are the basis for the economic success of Drei Bond. Thanks to their skills and their engagement, they save the company's future. Drei Bond is a fair and flexible employer which maintains an open and confident communication structure. The most important corner stones are esteem and team spirit.
